What did you most like about the SELA program?

What did you most like about the SELA program?

Interesting and diverse subjects. The programme has prepared me well for further studies/research within the field. Support from my thesis supervisor was excellent. I am overall very satisfied with my experience with SELA.

Theory

It was very flexible and easy to follow despite my job.

What did you least like about the SELA program?

What did you least like about the SELA program?

As this is a distance course, at times the feedback from staff were lacking. Guidelines and project instructions were often not clear and it was hard to pinpoint how to approach the subject.

This last course. Very badly planned, with little support.

Too many hours in front of the PC screen.

Suggestions for changes:

Suggestions for changes:

More lectures on video format. More contact between students/staff and students/students. Online group work should be increased, however it should be arranged in a way that students are in similar time zones. E.g. it is hard to work in a group when half the group is in Europe and half is in S/N America.
